Microbiol. 135:1113-1122(1989).

- SUBUNT: THE PILI ARE POLAR FLEXIBLE FILAMENTS OF ABOUT 5.4

- NANOMETERS DIAMETER AND 2.5 MICROMETERS AVERAGE LENGTH; THEY
CONSIST OF ONLY A SINGLE POLYPEPTIDE CHAIN ARRANGED IN A HELICAL
CONFIGURATION OF FIVE SUBUNITS PER TURN IN THE ASSEMBLED PILUS.

- SIMILARITY: BELONGS TO THE N-ME-PHE PILI FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  8
